

**Thawte** is the first issuer of SSL certificates from outside the United States. As the main competitor of American exhibitors, it quickly gained a 40% market share in SSL certificates. In 2000, Thawte merged with VeriSign and became a key member of the corporation. Thawte has issued nearly one million SSL certificates protecting domain names and software signing. Thawte certificates are used by customers from over 240 countries. In 2017, Thawte and Symantec Website Security came to DigiCert Inc.
